“

A world of sensations awaits you

**This is a true invitation extended to you.
Like a pause in your day, a moment dedicated to relaxation.**

The warmth of a traditional sauna, the scent of wood, a large glass surface — everything comes together in perfect harmony. Utopia conveys a feeling of escape and freedom. A cocoon where you rediscover serenity and detachment, carrying you away on a journey of your own choosing.

”

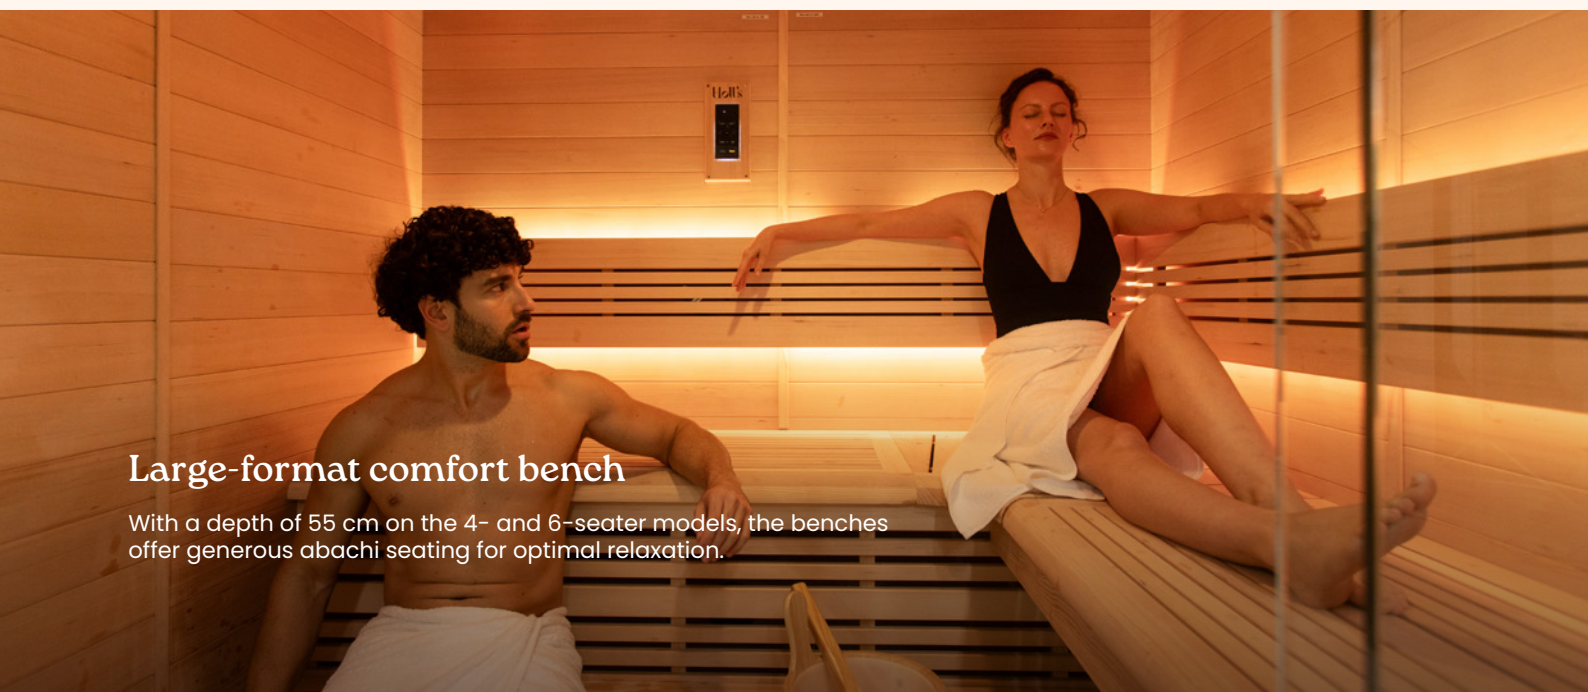

Premium Hemlock wood

Stable, durable, and minimally sensitive to temperature variations, this noble wood ensures an elegant cabin perfectly suited to the demands of a sauna.

Starry sky effect ceiling

Composed of integrated micro-LEDs randomly distributed to simulate a starry sky, this ceiling creates an immersive and soothing atmosphere.

Large-format comfort bench

With a depth of 55 cm on the 4- and 6-seater models, the benches offer generous abachi seating for optimal relaxation.

DIGITAL DISPLAY

The integrated touchscreen allows you to control your audio preferences easily and intuitively — a rare feature in steam saunas, ensuring a fully immersive sound experience.

PANORAMIC VIEW

Immerse yourself in a captivating experience thanks to the sauna's large glass surfaces. These generous openings flood the interior with natural light while creating a harmonious connection with the outdoors.

7-COLOR LED CHROMOTHERAPY

Using the touchscreen control panel inside the sauna, you can create the colored ambiance of your choice. The LED lighting inside the cabin diffuses a spectrum of seven colors inspired by chromotherapy principles.
